Introducing MBA IT and VEGA Europe

MBA IT is one of the leading providers of IT solutions in London. With an impressive 30% year-on-year growth since 2005, at MBA IT we have significantly grown our client base by demonstrating the value we bring to businesses through IT solutions. With recent client additions such as Selfridges, All Saints, Travelex, Anesco and EDF, the experienced Account Management and Technical Consultancy Team build long term relationships with clients by providing the highest standard of service, consultancy and support on the market.

VEGA Europe focus on making your communications easy through their expertise in Audio Visual Integration, Video Collaboration, Digital Media, Workspace Management Solutions and Unified Communications.

At the outset, we provide consultancy with advice and recommendations to enable you to select the most appropriate unified communications strategy for your business. This will ensure your staff communicate, meet and present information efficiently, ultimately saving your business costs and maximising profits.

We can offer clients a truly global solution with 22 offices located across 15 countries world-wide. In addition, we have an established network of partners to provide a truly Global Presence and service offering. This global network allows us to offer our clients full global support contracts offering 24/7 round the clock support.

What do our clients say?

I was impressed by the professionalism of VEGA's engineers. They followed our strict security guidelines and installed the video conferencing equipment in our London office meeting rooms within a day.

Facilities Manager
International Bank

With so many different video collaboration choices on the market, it was difficult to decide which system was best for our company. VEGA helped point us in the right direction and we now have a future-proof system which is easy for our employees to get to grips with.

Communications Manager
Global Pharmaceutical Company

I'm very satisfied with the quality of work that you guys have performed. I appreciate that you took ownership of the project, made decision on our behalf that we couldn't make without being onsite, stayed in constant communication of progress, and remained flexible to work around our schedule. Thanks very much for you hard work.

AV Infrastructure Engineer
Worldwide Internet Television Network

Audio Visual Solutions

Partnering with the world's leading Audio Visual manufacturers we offer clients the very latest technology. Often integrated with other communications technology, Audio Visual environments can become complex. We simplify our system designs, in order to give the client the most intuitive and consistent user experience.

Our projects in both the public and private sectors include meeting rooms, conference rooms, board rooms, lecture theatres, reception areas and break-out areas.

Our in-house engineering teams are manufacturer certified to the highest level and benefit from our policy of continuous improvement through training.

In addition, we provide an ongoing global maintenance and support service 24/7 to give you complete peace of mind.

The team's quiet confidence, patience and ability to solve all the issues that have arisen during a very difficult install has won admiration from the wider facilities team as well as myself. They coped admirably with last minute changes and tight deadlines.

Regional Facilities Manager
Multinational Technology Corporation

Video Communications

Video Conferencing Solutions

We are experts in providing video conferencing solutions with access to the full range of Cisco, Polycom & Lifesize Endpoint, Desktop and Infrastructure portfolios. With a vast range of software clients and applications such as Cisco Jabber, MS Lync, Google Hangouts, Skype, Go-to Meeting and other cloud based services, there is no limit to the choices customers now have with Video Communications. VEGA can help bring together any form of Video Communication to a single unified platform to enable users to integrate with Voice and Collaborate with content.

Immersive Telepresence Solutions

A truly immersive telepresence solution, gives participants the most life like Video Conferencing experience possible. The room set-up and preparation is essential, relying on expertise in lighting, acoustics and decoration. VEGA hold both the Polycom Immersive certification and the CISCO Telepresence Video Master Multinational, for designing and implementing CISCO Immersive Telepresence Suites from start to finish.

Cloud and Hosted Video Services

A simple way for users to gain all the benefits of Video Conferencing, whether it is from the meeting room or a personal device is to connect via a cloud based service that is always available with guaranteed high definition quality. No matter which standards based Video Conferencing solution the user prefers, software or hardware based, a cloud service offers complete connectivity, interoperability and peace of mind.

Skype For Business & Collaboration

With VEGA's collaboration solutions there are no geographical boundaries to how people can share content, communicate and interact. Web Conferencing is a collaboration tool to help businesses reach decisions faster by providing enabling tools such as data sharing, integrated audio & video. Record and playback facilities, allow users to view and listen to a conference at a later date.

Touchscreen technology and collaboration software allow clients to interact with content, whether they are in a meeting room or have a mobile device. MBA and VEGA are able to take IT based applications, such as Skype for Business and present them on large format interactive displays in meeting space environments providing a truly collaborative solution.

Further integration with Video Conferencing solutions allows our clients to communicate and collaborate across a single platform using multiple source formats.

Everyone in the Heathrow office is over the moon with the work that was done and how professional everyone was. We will definitely be in touch with regards to any future requirements.

Head of IT

A Leading British Union

Digital Media Communications

Digital Media is recognized as the most effective route for one way communication.

IPTV

An IPTV solution from VEGA can accept multiple Satellite and Digital Terrestrial feeds and encode various other digital content sources and multicast them across an IP network. The live TV channels and encoded content can be displayed on large format displays using a hardware receiver or on a PC, Laptop or Tablet using a software client.

Video on Demand

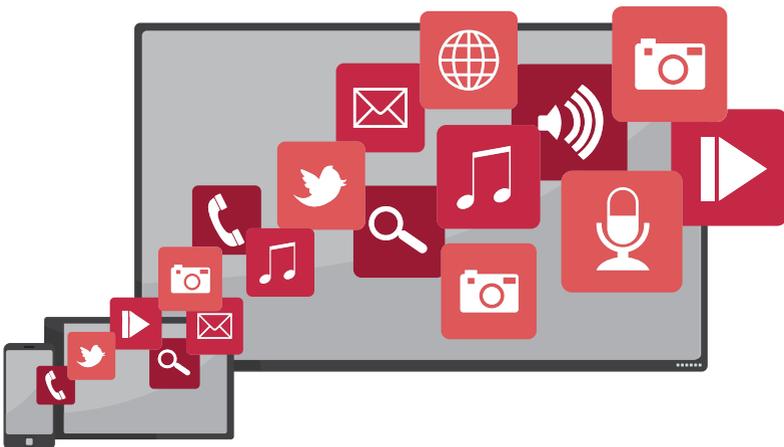

Our video on demand service puts the user in complete control of what and when they view Digital Content. Users can request on demand pre-published and pre-recorded Digital Media, which is centrally stored on a content library.

Live Streaming

If you have breaking news or a scheduled event such as a company announcement live streaming allows users to view the broadcast live on a portal accessed via a URL.

Digital Signage

Digital Signage. Digital signage provides an engaging way to create, manage and deliver a range of information to audiences in a public forum. Our solutions offer a flexible platform to deliver a rich medium of digital content formats to your audience in the relevant location and at the right time.

Workspace Management

Meeting Room and Desk Space Management

If you are looking to expand your premises or manage your working environment more effectively, VEGA can assist to find the right solution for your business. We partner with leading workspace management innovator Condeco, to conduct workspace occupancy studies and deliver meeting room and hot desk booking systems.

By implementing a very low cost and simple wireless sensor under each desk and each meeting room table, VEGA can record, analyse and report your office occupancy and your meeting room utilisation. The report will demonstrate how a more flexible and dynamic approach to how you allocate, book and use your workspace and meeting rooms can make huge cost savings in a very short space of time.

Hospitality Services System

Meetings run smoother with fewer interruptions, so VEGA have developed a solution to make ordering refreshments during meetings simple with minimal disruption. Tio allows guests to seamlessly order their beverages via an i-Pad before and during their meeting. The solution eliminates the need for a member of catering staff to visit a meeting room at the start of a meeting and write down requests for each guest. It also reduces the number of errors made when taking orders and speeds up the delivery process, as orders are delivered directly to the kitchen. If your business typically orders tea and coffee in advance for client meetings, this system reduces waste by only ordering exactly what is required by each guest.

Telephony & Voice

Hosted VOIP

VEGA Voice is designed to offer businesses scalable future-proof technology with all the features you would expect from a Cloud UC platform built by the world's leading cloud UC vendor. Built on Broadsoft's BroadCloud PBX, VEGA offer a fully-managed, full-feature hosted PBX that provides a comprehensive range of Unified Communications services for business users, delivered from BroadSoft cloud infrastructure.

Enhanced UC Voice

VEGA offers a range of enhanced business solutions such as Attendant Console & Call Recording that can be readily deployed to extend Enterprise PBX services.

IP Handsets & Headsets

VEGA offers a compelling range of IP phones for the business user providing our clients with choice and flexibility to meet the requirements for enterprises of all sizes and budgets.

Services

Consultancy

Before embarking on a new project, we like to understand your business and future plans fully, to ensure we are offering the right solution. With the changing face of modern day working practices, we recognize that a 'one size fits all' approach is no longer appropriate for today's working environment. With the continued convergence of audio visual technologies with Video, Voice and IT based environments the landscape ahead is sometimes unclear and the right solution is often different for each client.

Professional Services

Our service delivery system ensures that you can rely on VEGA to provide the complete turnkey solution to your requirements from consultancy, design and development, to installation & on-going maintenance and support "in-house".

As our client, you can be assured of:

- A project manager as the single point of contact throughout the project
- Complete procurement management
- Complete delivery management
- Single point of accountability and responsibility
- Ensemble Delivery Services

VEGA's Professional Services offering encompasses the following:

- Site Assessment and Surveys
- System Design
- Project Management
- Installation Engineering
- Rack Build and Pre-Testing
- Programming
- Training
- Documentation and Handover
